We recommend the 3-light models for an 8' pool table and the 4-light models for a 9' table. The 3-light "Tiffany" models fit an 8' table better than a 9' unless they have 4 lights. We also highly recommend shades that shade the player's eyes from the lightbulb.

## Toltec Billiard Lighting

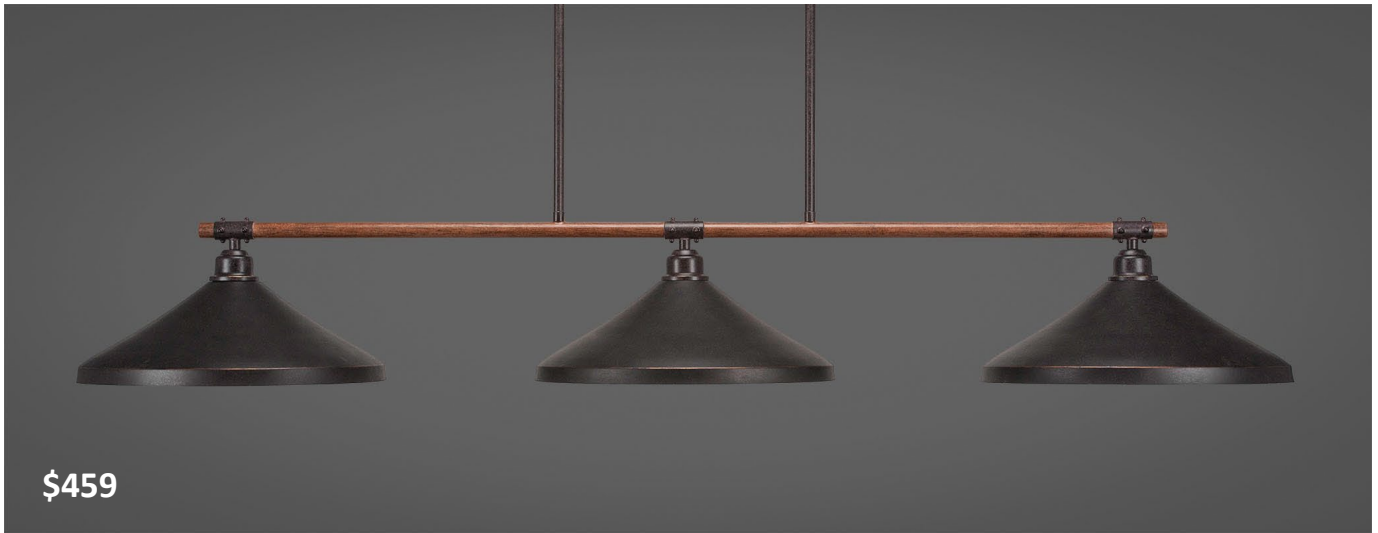

### The Portland w Dark Granite Shades (can pair w any 14" metal shade)

I may have mentioned Perimeter Lighting to some of you and you will need a contractor or someone skilled in lighting installation (or yourself) to install this light. We do not install lighting for purposes of liability.

These are the lights being used by many tournament directors now so that they can stream the view from the top. The lighting provided by the rectangular shape is obviously an excellent way to light a billiard table.
